Professional Summary

Senior Full Stack Software Engineer with 7+ years of experience building enterprise-scale applications using Java, Spring Boot, Vue.js, Angular, PostgreSQL, REST APIs, Docker, CI/CD, and cloud technologies. Experienced in designing scalable backend systems, debugging complex production issues, code reviews, API development, and modernizing legacy applications. Passionate about AI, large language models, and improving AI systems through high-quality code evaluation and technical reasoning.

Technical Skills:

- Java, Micro services, REST Api's, Microservice, Python, Spring Boot
- Angular, VueJS, JavaScript,GWT Typescript
- Linux, Windows
- MySQL, PostgreSQL, Hibernate
- Bitbucket, GitLab, CI/CD, GIT, Postman, Jenkins
- Maven, Gradle
- GCP (Compute Engine, App Engine, Kubernetes Engine, Cloud Storage, Bigquery, Pub/Sub, IAM, Cloud Monitoring, Cloud logging)
- AI/ML/NLP (basics)

Qualifications:

- B-Tech (CSE) - Aditya College Of Engg. And Technology (JNTUK)

Certifications:

- Google Cloud Certified Associate Cloud Engineer (ACE)

Domain's:

- Healthcare
- Automotive
- Transportation & Logistics(gov)
- E-commerce

Major Projects:

Glance EMR (Spring MVC, GWT, JSP, Servlets, Jenkins)

Healthcare clinical documentation platform for large and mid-sized providers.

- Owned and maintained core modules including FAX, CNM, Blackboard, and SOAP.
- Led migration of legacy components to GWT and Spring MVC.
- Delivered scalable frontend and backend features aligned with client requirements.

Worldwide Harmonized Light Vehicles Testing Procedures(AngularJS, Spring Boot)

Client: Jaguar Land Rover

Carbon emissions reporting platform enabling CO₂ analytics for vehicle compliance.

- Designed and implemented purge/un-purge module for vehicle models.
- Defined AngularJS architecture including components, state management, routing, and API integration.
- Implemented backend services based on complex calculations and business rules.

Electronic Distribution System (EDS) Analytics (Angular 14, Spring Boot, GCP, Python)

Client: Jaguar Land Rover

Analytics platform for billing and spend analysis of vehicle electronic components.

- Built and optimized backend controllers and data processing workflows.
- Owned Java and frontend modules, delivering scalable and high-performance UIs.
- Collaborated with global stakeholders and delivered insights using BigQuery and Tableau.

Harbors Management System(Vue.js, Spring Boot)

Client - Department of Transportation –Harbors Division, Hawaii

System for harbor operations(ship movement, cargo, passenger tracking), billing, and financial planning.

- Contributed to the migration and modernization of the legacy CIDS/eCIDS system into PHIMS
- Developed and enhanced Vue.js frontend components and integrated them with Spring Boot APIs.
